<ul style="list-style-type: none"> <li>– issues of “public management” and “performance management” applied to national and international institutions, in particular:                         <ul style="list-style-type: none"> <li>• overall functioning, specific organizational dynamics and management tools of public administration and international organizations</li> <li>• systems of accounting, budgeting, reporting and performance measurement of public administrations and international organizations</li> <li>• legal principles and regulations that govern public administrations and international institutions</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>– Strategic and HR management public organizations</li> <li>– Public accounting and performance management</li> <li>– National and international institutions law</li> </ul>
<ul style="list-style-type: none"> <li>– issues of “economic and public policy analysis,” in particular:                         <ul style="list-style-type: none"> <li>• the functioning of the global economic system and of the institutions that govern it</li> <li>• analytical tools for understanding the political system and the mechanisms of national and international public policies</li> <li>• methods for analysis and <i>ex ante</i> and <i>ex post</i> evaluation of public policies</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>– Economics and policy of global markets</li> <li>– Politics and policy making</li> <li>– Policy analysis and evaluation</li> </ul>
<ul style="list-style-type: none"> <li>– statistical methods and tools used for processing and analyzing data and to support the decision making processes of public administrations and international institutions</li> </ul>	<ul style="list-style-type: none"> <li>– Quantitative methods for social sciences</li> </ul>

<b>Applying Knowledge and Understanding</b>	
<p>Graduates will be able to:</p>	<p>Ability to Apply Knowledge and Understanding will be achieved through the following courses:</p>
<ul style="list-style-type: none"> <li>– Apply knowledge acquired in the issues of “public management” and “performance management” of national and international organizations, in order to:                             <ul style="list-style-type: none"> <li>• analyze and interpret the critical issues of budgeting and reporting in the public sector and in international institutions and be aware of their recent evolutions</li> <li>• act autonomously with technical competence in solving management problems of public administration and international organizations and in identifying and proposing trajectories of possible innovation</li> <li>• assess constraints and opportunities in regulatory provisions</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>– Public accounting and performance management</li> <li>– Strategic and HR management public organizations</li> <li>– National and international institutions law</li> </ul>
<ul style="list-style-type: none"> <li>– Make use of knowledge acquired in the issues of “economic and public policy analysis,” in order to:                             <ul style="list-style-type: none"> <li>• manage autonomously and with technical competence all steps regarding public policies (planning, formulating and evaluating)</li> <li>• organize and manage complex processes of inter-institutional governance to support the policy-making activity</li> <li>• apply suitable qualitative and quantitative methods to estimate the impact of public intervention</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>– Economics and policy of global markets</li> <li>– Politics and policy making</li> <li>– Policy analysis and evaluation</li> </ul>
<ul style="list-style-type: none"> <li>– apply, by using specific software, the suitable data processing statistical methods aimed at optimizing decisions in public administrations and international institutions</li> </ul>	<ul style="list-style-type: none"> <li>– Quantitative methods for social sciences</li> </ul>

**CUSTOMIZED AND LINGUISTIC AREA OF STUDY**

**Knowledge and Understanding**

Graduates will have acquired wide-ranging and in-depth knowledge of their choice related to topics in specific areas, identified based on their interests and in line with the educational program.  
 Regarding languages, graduates will strengthen their knowledge in English (which is an entry requirement) in order to achieve, at least, a B2 business level; moreover they will acquire knowledge of a second EU language (Italian: at least level A2; other EU language among those listed in the University Guide: at least level B1 business. Italian is compulsory for non-Italian native speakers).

**Applying Knowledge and Understanding**

Graduates will be able to apply the methodologies acquired during the study program and use related practical tools; over time, they will be able to analyze and interpret the environmental context of reference for issues related to the areas of the study program and apply the logical methods acquired for tackling any new problems that may emerge during their professional lives.  
 Regarding languages, graduates will demonstrate abilities in English (written and oral comprehension and expression (at least post intermediate - business level) and abilities in another EU language (at least elementary level; the exit level depends on the language – Italian or other EU language – and on the student’s entry level).

<b>Making Judgements</b>	Graduates will acquire the ability to integrate knowledge, manage complexity and make judgements even with partial information, including considerations and assessments regarding social responsibility and ethics related to the application of economics and managerial skills, particularly critical in the area of intervention of public companies and international institutions.
<b>Communication</b>	Graduates will acquire skills and tools appropriate for the management and transfer of information, both to specialists and non-specialists of the topic. In particular, they will be able to express themselves clearly and effectively in any setting. They will be able to make a presentation in public using the most modern IT tools.
<b>Lifelong Learning Skills</b>	Graduates will acquire learning skills that allow them to be autonomous in updating and developing their knowledge and competences in various professional contexts for public companies and international institutions.
